EZTransportation™

Student Transportation Made EZ

A modern, integrated transportation management platform designed exclusively for K-12 school districts — powered by real-time intelligence.

Transact

Why Choose EZTransportation?

Easy to Implement & Use

Half of all school districts don't use routing software to its full potential because it's too cumbersome and complicated to master. Because of this, we made our system simple to use, so anyone can learn it quickly and easily.

Highly Functional

EZTransportation provides cloud-based routing and activity trips management, is calendar-based, syncs with your SIS, and provides real-time notifications. It also features a Sandbox for scenario exploration, auto-generation of routes, bell time studies and planning, a parent app, and student tracking.
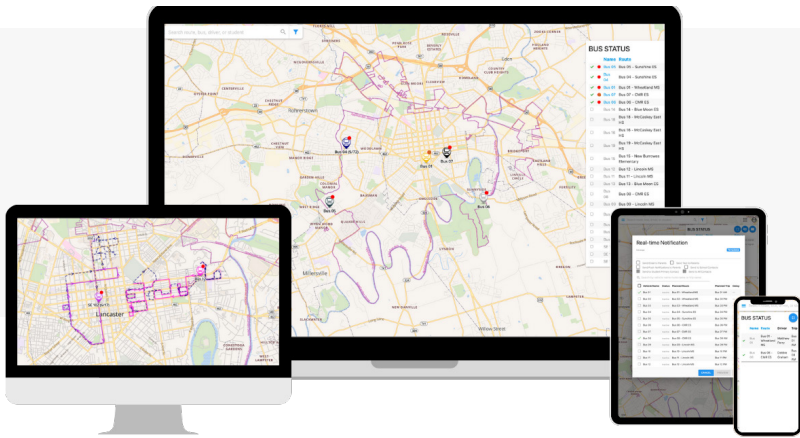

Unequaled Real-Time Intelligence

Get accurate, up-to-the-minute information about students and buses — even when things don't go according to plan. Know which students have checked on or off each bus at any given time, regardless of a bus substitution or route consolidation. Accurately predict bus arrival times due to last-minute changes or delays so you can proactively alert parents. Provide schools with accurate arrival information when bell times will be missed. And provide accurate turn-by-turn directions to bus drivers when last-minute route changes or driver substitutions occur.

Competitively Priced

We believe that high-quality products and services should be accessible to everyone. Our competitive pricing ensures that you can enjoy the best without the premium price tag.

How EZTransportation Can Help...

Planning & Assignments – **Efficiently manage student transportation logistics.**

- ✓ Route planning, student assignments, and optimization
- ✓ Scenario exploration and evaluation
- ✓ Routing of students with varying schedules and/or pick-up/drop-off locations during the week

Daily Operations – **Easily address daily challenges, such as...**

- ✓ Driver shortages/last-minute call-outs
- ✓ Mid-route breakdowns/vehicle inspection failures
- ✓ Fleet maintenance, including integrated vehicle work order tracking, preventive maintenance scheduling, and inspection and parts management
- ✓ Driver information management, time tracking, and leave requests

Navigation/Ridership/GPS – **Expand your visibility and enhance driver satisfaction *and* student safety.**

- ✓ Know exactly where each of your buses are
- ✓ Identify which students are on the bus
- ✓ Seamlessly communicate changes to drivers
- ✓ Easily respond to parent inquiries

Parent Communications – **Proactively communicate with parents and provide self-service access to their child's ridership information.**

Find out for yourself why EZTransportation is the easiest, most functional and affordable transportation management solution available.
